

Feature Comparison Between Advanced and Standard 360 View Creator

How to compare the different features of the 360 View Creator and the Advanced 360 View Creator?

Feature Comparison

The main advantage of the Advanced 360 View Creator over the standard 360 View Creator is the support of hotspots. We stopped updating the Advanced 360 View Creator at version 1.6 and moved all development over to the 360 View Creator (version 4.0 or higher includes hotspots functionality). If you purchase the Advanced 360 View Creator you have access to the standard 360 View Creator.

Feature Description	360 View Creator (Version 3.1 and older)	360 View Creator (Version 4.0 and newer)	Advanced 360 View Creator (discontinued)	Notes
Upload to Iconasys 360 hosting				Supported only in the standard version
Self hosting of HTML5 Java Script				Both versions support local and self hosting HTML5, Java Script enabled, outputs
MP4 video output				Only supported by the standard version
Interactive MP4 Java Script				Only supported by the standard version
Hotspots				Supported by standard version 4.0 and higher
Animated GIF output				Only supported by the standard version
Multi-row outputs				Supported by both versions
